## Projects

<b>Front-end Developer</b>	<b>Jobit</b> Remote	<b>2023</b>
<ul style="list-style-type: none"><li>• Collaborated with a skilled team of developers and creative designers to develop a user-friendly interface from a high-fidelity Figma design</li></ul>		

- Used Redux Toolkit to smoothly manage the app's main state, enabling seamless interaction in the complex frontend. This lowered the requirement to pass data through many parts, reducing unnecessary updates and making the platform more efficient and responsive.
- Engineered a fully responsive website to deliver a consistently optimal user experience by prioritizing usability and accessibility across desktops, tablets, and mobile devices.

## Front-end Developer

## CarRent

2023

Remote

- Developed a dynamic web application while keeping in mind all the best UI/UX practices from a high-fidelity Figma design
- Communicated between frontend and backend development teams for the entire sprint, leading to seamless development and deployment while maintaining a proper Git and GitHub workflow
- Used Next.js 13 to reduce time-to-market, SEO support, and the clever server-side rendering to load pages leading to faster page loading times. Followed the best code practices such as DRY, KISS, and YAGNI to create modular, reusable, and higher-order components. Used Tailwind CSS to develop the ultimate highly customized responsive web application

## Technologies and Languages

---

- Next.js, React, JavaScript, TypeScript Tailwind, MongoDB, Mongoose, Git, GitHub, HTML, CSS, Material UI, CSS
