Hello, I'm Miguel, a Software Developer seeking to launch a career building web applications in Nextjs. Experienced in collaborative web development.

Work Experience

Freelance Software Developer   **Company**   **Dec 2023 — Present**

Apostolic Community

- Collaborating with Apostolic Community to strategize and develop a custom website tailored to meet their objectives
- Committed to delivering a professional website that represents the community's identity and values

Tire Technician   **Company**   **Dec 2020 — March 2022**

Sam's Club Reno

- Maintained and managed tire and hardware inventory with regular stock assessments
- Dismounted, mounted and repaired tires according to manufacturer specifications
- Maximized efficiency by coordinating changing and rotating of tires
- Assisted team by keeping shop tidy, clean and free of safety hazards
- Actively listened to customers, handled concerns quickly and escalated major issues to the supervisors
- Received and processed stock into inventory management system.

Front End Associate   **Company**   **Feb 2020 — Dec 2020**

Sam's Club Reno

- Helped customers complete purchases, locate items and join reward programs
- Restocked and organized merchandise in front lanes
- Answered questions about store policies and addressed customer concerns
- Worked flexible schedule and extra shifts to meet business needs
- Checked personal identifications during alcohol and tobacco sales
- Reviewed new promotions and monitored price changes

Shift Manager   **Company**   **April 2017 — March 2020**

McDonalds

- Trained and mentored new employees to maximize team performance
- Kept employees operating productively and working on tasks to meet business and customer needs
- Tracked receipts, employee hours and inventory movements
- Worked closely with team members to schedule breaks and shifts to meet state regulations

Education and Certifications

- **JSM Masterclass Experience**: Remote (2023)
- **High School Diploma:** Galena high school (2017)
- **Truckee Meadows Community College**: Completed 30 Credits towards AS in Business (2018-2019 Transferred)
- **Purdue University:** Incomplete Degree in Business (2020-2021 Withdrew)

Relevant Experience / Projects

Software Developer   **JSM Masterclass Experience**   **2023** January - Present

In the JSM Masterclass I began my software developer journey. This immersive six-month coding program propelled me into hands-on experience. Within the masterclass we mimic a day to day developer workflow building modern full-stack apps.

Collaborating with a team of developers, I actively contributed to the development of three applications, and a fourth solo project. The process involved segmenting the projects into manageable parts, allowing us to select or receive designated tasks. Upon completion, each pull request went into review. Seasoned engineers carefully assessed each line of code and gave me feedback. Which I then refactored and with their approval integrated into the project.

In every project, we received comprehensive Figma designs, which helped me effectively use the developer tools. Our project management relied on Asana, while discord & google meet served as our go to platform for daily standups and weekly team meetings with mentors.

Front-end Developer   **Jobit**   **2023**

JSM Masterclass Experience

- Collaborated with a team of developers and designers to develop a user-friendly interface from a high-fidelity Figma design
- Used Redux Toolkit to smoothly manage the app's main state
- Engineered a fully responsive website to deliver a consistent user experience making the website accessible across desktops, tablets, and mobile devices.

Front-end Developer   **CarRent**   **2023**

JSM Masterclass Experience

- Developed a dynamic web application from a high-fidelity Figma design
- Communicated between frontend and backend development teams for the entire sprint, leading to seamless development and deployment while maintaining a proper Git and GitHub workflow
- Used Next.js 13. Followed the best code practices such as DRY to create reusable and higher-order components. Used Tailwind CSS to develop a responsive web application

Full-stack Developer   **Hipnode**   **2023**

JSM Masterclass Experience

- Developed a social media application from an extensive Figma design using React Vite, Express, MySql & Prisma
- Implemented an upload middleware on the backend
- Created Podcasts and Meetups Page. Setup UI and backend routes to display dynamic data from the database

Other Projects

Full-stack Developer   **Promptopia**   **2023**

Link

- Developed an AI prompt sharing application
- Contains CRUD functionality using the app directory and api folder
- Sign in functionality using google providers
- Technologies used: Nextjs, Next-auth, Javascript, Mongoose, MongoDb

Full-stack Developer   **Filmpire**   **2023**

Link

- Developed an application where users can search for movies via the TMDB api
- Uses search, favorite and watchlist functionality
- Technologies used: React, Material UI, Redux, TMDB api

Technologies and Languages

- Next.js, React, JavaScript, TypeScript Tailwind, MongoDB, Mongoose, Git, GitHub, Shadcn, Material UI
